## **EXHIBIT N**

Brian Flynn, M.D.

Page 1

SUPERIOR COURT OF THE STATE OF CALIFORNIA FOR THE COUNTY OF KERN CASE NO. 1500-cv-279123 LHB Assigned to the Honorable Lorna H. Brumfield Reservation No.: 4676

DEPOSITION OF BRIAN FLYNN, M.D.

January 7, 2015

COLEEN M. PERRY,

Plaintiff,

vs.

HUNG T. LUU, M.D.; JOHNSON & JOHNSON, a New Jersey corporation; ETHICON, INC., a New Jersey corporation; and DOES 1-60,

Defendants.

## **APPEARANCES:**

WAGSTAFF & CARTMELL, LLP

By Jeffrey M. Kuntz, Esq.

4740 Grand Avenue

Suite 300

Kansas City, Missouri 64112

Appearing telephonically on behalf of Plaintiff.

BUTLER SNOW, LLP

By Nils B. (Burt) Snell, Esq.

500 Office Center Drive

Suite 400

Fort Washington, Pennsylvania 19034

and

BOWMAN AND BROOKE, LLP

By Barry J. Koopmann, Esq.

150 South Fifth Street

Suite 3000

Minneapolis, Minnesota 55402

Appearing on behalf of Defendants.

Also present: Sean Keith, Esq.

## Brian Flynn, M.D.

2 (Pages 2 to 5)

Brian Flynn, M.D.

Page 62 Page 64 1 A Yes. 1 A It is, yes. 2 Q And what do you recall about those 2 Q Is -- do you believe laser-cut mesh is 3 3 better than mechanical-cut mesh? documents, or what documents did you review? 4 4 A I can't remember the specific documents A I would say it's different. I prefer it, 5 without having them in front of me, but just in 5 but I don't think there's any scientific studies to б 6 general, that people were at least opening up the say it's superior. 7 7 discussion on what key opinion leaders and others Q Do you -- have you read any deposition of 8 8 Ethicon employees that believe that the laser-cut thought about how to tension it. Should it be 9 tensioned the same or differently. 9 mesh is superior to the mechanical-cut mesh? 10 10 Q Do you recall reviewing any documents that MR. SNELL: Foundation objection. Go 11 11 ahead. physicians -- or strike that. 12 12 Do you recall reviewing any documents in Q (By Mr. Kuntz) I guess you haven't read 13 forming your opinion in this case about Ethicon 13 any internal depositions from any Ethicon employees? 14 14 employees having concerns about tensioning with A No. I've just seen bits and pieces from 15 15 laser-cut mesh? depositions. Some of them in the form of exhibits 16 16 A I think that there was some awareness. I that were put in front of me in other depositions 17 guess you could use the word "concern." There was 17 that I've given, and then some of the in-house 18 18 discussion, like I mentioned, that it's something documents that I have in front of me, they -- but no, 19 19 that people who instruct on the procedure were I don't have a lot of that information. I wasn't 20 wondering what they should be telling their students 20 privy of a lot of that information. 21 Q Is there any -- you had talked about easier 21 Q Did you ever, in forming your opinions, 22 22 to deploy and tensioning -- I think you said looser think, "Hey, maybe I want to read what the internal 23 23 with the laser-cut mesh are things you taught at Ethicon employees, scientists, and medical directors 24 cadaver labs, correct? 24 were saying about the issues in this case"? 25 25 MR. SNELL: Objection, form, compound. A Those were comments that I would make to Page 63 Page 65 people who would ask me advice about it. I can't say 1 A No. I don't think that's really my role in 2 for sure it occurred at a cadaver lab. It could have this case. I'm not a materials science expert, and I 3 occurred at other Ethicon events or at scientific 3 think there's other people that are experts for 4 meetings or just, you know, amongst -- conversation 4 Ethicon that can probably speak to it better than me. 5 5 with colleagues in other specialties at the hospitals Q (By Mr. Kuntz) Speak to what better than 6 that I work at. 6 you? 7 Q What do you tell your students at 7 A Speak to the biomechanical data, if there's 8 8 University of Colorado about laser-cut mesh versus any differences. I'm aware of differences that I see 9 9 mechanical-cut mesh? grossly with my naked eye when I have the material in 10 10 A Well, at this point, it's not a front of me, you know, how the edges are smoother on 11 11 conversation we really have because all we've been the mechanically-cut, how the mesh is -- appears to 12 using is laser-cut mesh really since it became 12 be brighter or bluer. 13 13 You know, those are things that I see, you 14 14 So it's more of a historic conversation. know, in my practice and when I'm implanting a mesh. 15 That probably would be beyond what a student would be 15 Q So you believe other people are suited to 16 interested in, but it was conversations that I had, 16 talk about the scientific or differences between 17 17 you know, when there was a transition period. laser-cut mesh and mechanical-cut mesh as opposed to 18 So during those years, say, from '7 to like 18 19 19 '10 or '11, it would be a conversation, but once we MR. SNELL: Objection. It misstates. 20 20 had a group of residents who only had experience with A I'm stating I'm prepared to answer 21 the laser-cut, that's all they knew. They really 21 questions as a physician and a clinician with respect 22 22 didn't need to understand tensioning mechanically-cut to laser-cut and mechanically-cut, but I'm not an 23 because it was something that I wasn't using in my 23 employee of Ethicon. I didn't develop the mesh. 24 24 practice; hence, they wouldn't be using. I feel there's people better in the company 25 Q Is the TVT Exact laser-cut mesh? 25 to explain those differences than I am, yes. I'm not
